

REAR MOONS

On rear moons there are (2) different sizes.

(1) is 8" across we call it a thick lip

(1) is 8 1/4" across we call that our thin lip

P/N 22584 – IS A THICK LIP – LOOK WHERE THE ARROW IS POINTING. THIS IS THE 8"

P/N 22584-THIN – IS A THIN LIP – LOOK WHERE THE ARROW IS POINTING. THIS IS THE 8 1/4"

P/N 22584I – IS A THICK LIP

P/N 22584I-THIN – IS A THIN LIP

BELOW YOU WILL SEE PICTURES OF WHAT THEY WOULD BE INSTALLED ON AND HOW THEY ARE INSTALLED.

If a customer came in and was missing the top of the top hat on the rear, you would measure across the lip on the outside to outside to see if you need the thin lip or the thick lip. Once you have determined which one, just line up the moon and pop it on per picture below.
